### sample Upper Cut - Alaskan Thunder Fuck

SDPharmLabs

Sample ID SD220902	-002 (51930)	Matrix Concentrate (Inhalable Cannabis Good)	
Tested for California	Diamond Distribution		
Sampled -	Received Sep 01, 2022	Reported Sep 06, 2022	
Analyses executed C	AN+	Unit Mass (g) 2.0	

Laboratory note: The estimated concentration of the unknown peak in the sample is 11.0% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total d8-THC is estimated to be 77.1%.

## CAN+ - Cannabinoids Analysis
