Sample Torch - Sour Lemon Cherry N02770

Sample ID	SD230517-043 (75605)		Matrix	Edible (Other Cannabis Good)	
Tested for	Torch				
Sampled	-	Received	May 17, 2023	Reported	May 17, 2023
Analyses executed	CANX, QARUSH	Unit Mass (g)	100.0	Num. of Servings	20
				Serving Size (g)	5.0

Laboratory note: The estimated concentration of the unknown peak in the sample is 1.14%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-THC or d9-THC. At this time there are no reference standards available for (+)-THC. (+)-THC is a different compound from the main (-)-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-THC and d9-THC with the majority, if not all, of the concentration being (+)-THC. Total (+)-D8 Concentration is estimated to be: 7.30%

CANX - Cannabinoids Analysis

Analyzed May 17, 2023 | Instrument HPLC-VWD | Method  
The expanded Uncertainty of the Cannabinoid analysis is approximately ±.806% at the 95% Confidence Level

\*This report shall not be reproduced except in full, without the written approval of the lab. This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results are reported on an "as received" basis, unless indicated otherwise. When a Pass/Fail status is reported, that status is intended to be in accordance with federal, state and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.

PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC  
ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

Sample **N02862 Torch Rainbow Snow Cone Gummies**

Sample ID	SD230613-036 (79479)		Matrix	Edible (Other Cannabis Good)	
Tested for	Nectris		Received	Jun 13, 2023	
Sampled	-		Reported	Jun 14, 2023	
Analyses executed	CANX	Unit Mass (g)	113.8	Num. of Servings	20
				Serving Size (g)	5.69

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.48% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-8-THC or d9-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and d9-THC with the majority, if not all, of the concentration being (+)-8-THC. Total (+)-8-THC Concentration is estimated to be: 6.01%

PharmLabs San Diego | 3421 Hancock St, Second Floor, San Diego, CA 92110 | 619.356.0898 | ISO/IEC 17025:2017 Certification L17-427-1  
\*This report shall not be reproduced except in full, without the written approval of the lab. This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results are reported on an "as received" basis, unless indicated otherwise. When a Pass/Fail status is reported, that status is intended to be in accordance with federal, state and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.

PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC  
ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

Sample **N02864 Torch Mango Pineapple Gummies**

Sample ID	SD230613-037 (79480)		Matrix	Edible (Other Cannabis Good)	
Tested for	Nectris				
Sampled	-	Received	Jun 13, 2023		Reported Jun 14, 2023
Analyses executed	CANX	Unit Mass (g)	116.2	Num. of Servings	20
					Serving Size (g) 5.81

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.48% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-8-THC or d9-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and d9-THC with the majority, if not all, of the concentration being (+)-8-THC. Total (+)-8-THC Concentration is estimated to be: 6.06%

CANX - Cannabinoids Analysis

Analyzed Jun 14, 2023 | Instrument HPLC-VWD | Method  
The expanded Uncertainty of the Cannabinoid analysis is approximately **±.806%** at the 95% Confidence Level
